New Crestron wall mounted switch

To turn the projector on, press the ON button once. The projector will take 90 – 120 seconds to turn on. While the projector is starting, you should start the PC and log in to your AD account.

Once the projector has started, if the computer image is not on the screen you should press the first Computer Icon, this will select your PC as the Input. If you are not using the PC you can choose the correct input, Computer 2, video (for the DVD player), HDMI is not available at this time.

If you would like to temporarily black out the image, you can push the Mute Icon, this will blank the screen until you press the Mute Icon again.

To turn off the projector, press the OFF button once. The projector will automatically turn off. If you need to turn the projector back on you will have to wait for 120 seconds before the projector will respond to the ON command.
