

- Want to try a **challenging test** of introductory physics?
- Want a chance to **win prizes**?
- Want to compete with students from **around the world**?

Sir Isaac Newton Exam

Thursday, May 7, 2015

What is it?

The Sir Isaac Newton (SIN) exam is a physics test offered by the Department of Physics at the University of Waterloo aimed at students taking introductory courses. Each year, the exam is written by thousands of students from across Canada, the USA and abroad.

The exam, although challenging, is meant to be refreshing and fun. **The results are never seen by admission people and will not count against a student.**

What can I win?

The Department of Physics at Dawson College is offering a **\$100 grand prize** to the top local student, as well as **book prizes** for the second and third place finishers.

Additional prizes are also offered by the University of Waterloo to students who rank highly amongst all participants.
